

EC 565 ELECTRIC CLEANER

GENERAL DESCRIPTION

Norchem EC 565 is an inhibited non-flammable 'Fast Dry' cold solvent cleaner, which is designed for fast cleaning action on electrical equipment and components. Can be used while parts and equipment are in operation.

ADVANTAGES

- Rapid penetration into oily deposits
- Evaporates completely and leaves no residue
- Safe on all electric components
- Non-flammable, non-conducting and non-corrosive
- Improves electrical performance
- Excellent solvency

USES

Norchem EC 565 is used for the cleaning and degreasing of electric motors, generators, starters, switchgears, armatures, bearings, instruments, metal parts etc.

USE DIRECTIONS

EC 565 is applied neat by dipping, brushing, flushing or wiping. A non-atomizing spray is recommended for electric motor.

PRODUCT SPECIFICATION

Appearance	: Clear, easy flowing liquid
Flash Point	: None
TLV	: 100 ppm
Odour	: Characteristic sweetish odour
Stability	: 2 years when stored under sealed cover
Specific Gravity	: 1.35
Vapour Density	: Heavier than air

HANDLING PRECAUTIONS

Contains chlorinated solvents. Avoid contact with skin or eyes. Flush with copious amount of water if contacted and seek prompt medical attention for the eyes. Avoid inhaling vapours. Use only with adequate ventilation and keep away from open flames or welding arcs. Harmful if swallowed.

PACKAGE

Supplied in 20 or 25 litres container.
