

Fish Oil

Description

Norchem Fish Oil is used mainly as a lubricant for moving metal parts and also for the lubrication and protection of wire ropes.

Advantages

- Non-toxic
- Non-corrosive
- Economical
- No objectionable odour
- Biodegradability for easy disposal
- High Flash Point

Typical Application

Norchem Fish Oil is specially designed to protect, lubricate and extend the life span of wire ropes. Can also be used as a diluent for other types of wire grease.

Use Direction

Norchem Fish Oil may applied by spraying, brushing or dipping. Quantity to be used depends on the diameter and strands of the wire rope.

Product Specification

Appearance	: Yellow – Dark Brown liquid
Odour	: Slightly fishy
Flash Point	: Above 230°C
Density	: 0.94 – 0.99 (@15.5°C)
Stability	: Indefinite
